

SUPERFUND BLUE SPC CLASS A (GOLD USD) ENDED THE MONTH OF FEBRUARY WITH A PERFORMANCE OF -2.11 %

Superfund Blue employs a systematic equity market neutral strategy which aims to produce consistent returns regardless of wider market conditions with relatively low volatility. The fund can achieve capital gains by short term trading on the performance of stocks that are expected to outperform the overall market. A market neutral portfolio is created by hedging leveraged equity positions with index futures. The fully systematic Superfund Blue trading strategy trades on the performance of equities listed on major stock exchanges primarily in Europe, Asia and America. It is intended to have minimal or even no correlation to other asset classes, and therefore has the potential to be an effective diversifier for most portfolios.

The Superfund Blue Gold fund combines the Superfund Blue strategy with the price of gold in one single product. This unique combination offers an attractive addition to traditional investments.

Performance results shown in this document are net of fees (excluding upfront fees and taxes). Past performance is not indicative of future results. Superfund-products are speculative investments. A complete loss of the principal invested cannot be excluded. This constitutes neither an offer to sell nor a solicitation to invest. Such offer or solicitation will be made only in those jurisdictions where permitted by law and will be preceded or accompanied by a current prospectus and such other documents as may be required, such as the latest audited financial statements and audit report. The minimum investment is USD 30,000. Subsequent investments are USD 5,000 or more. In addition to the trading results of the Superfund trading strategy, the value of shares of Superfund Gold will be directly affected by movements in the US Dollar price of gold. No guarantee can be given that the total investment proceeds of Superfund Gold are always fully hedged to the gold price. Depreciation of the gold price will directly decrease the net asset value of Superfund Gold. The author and distributors of this material expressly disclaim any and all liability for any inaccuracies contained in this document, and shall not be held liable for the same. The Superfund Blue strategy may not involve the direct purchase and sale of equity securities, but rather may trade synthetically through total return swaps on such securities. Performance information is reported for Superfund Blue SPC Class A (Gold USD) only. Although other Superfund funds employ the same Superfund Blue trading strategy, there is no guarantee that the other funds will achieve the same results due to many factors including but not limited to different fee structures.
